## SRM-Silicone Restoration Membrane

DON'T  
REPLACE YOUR  
METAL ROOF,  
**RESTORE IT**

## What Causes Metal Roofs to Leak?

- Fastener failures
- Deteriorated sealants and closures
- Physical and weather damage
- Expansion and contraction caused by freeze/thaw cycles can result in issues at fasteners, seams and penetrations

**Coatings for a metal roof benefit the building owner**

because it eliminates the complete tear-off, fills in any tiny crevices that could allow damaging water into the building, and provides a new roof warranty. It's a cost-effective solution to any metal roof owner looking to extend the life of their roof.

# Metal Roof Restorations

## SRM-Silicone Restoration Membrane

## Advantages of a New Coating

- No more leaks! Seals entire surface to create superior watertight roof covering
- Cost effective! Coating is significantly cheaper than installing a new metal roof and eliminates the high maintenance costs of frequent repairs
- Stops rust and corrosion
- Non-disruptive to occupants and activities within the building
- New roof warranties included
- It extends the life of the metal roof, plus it can be recoated in the future to even further extend the roofs lifespan (recoat schedules vary by coating type and warranty)
